

Wave Multipurpose Drain Tile

- Durable solution for enhanced field performance and player experience.
- Designed for landscape and sports fields.
- 100% Recyclable with 20 year warranty.

GENERAL FEATURES:

Traffic Level:	Moderate to Heavy Traffic
Applications:	Landscape and Sports Fields
Product Colors:	Black

PRODUCT SPECIFICATIONS

Product Characteristics
Material: 100% Polypropylene Copolymer
Dimensions: 48 inches x 31 inches
Weight: 28.2 ounces
Overall Thickness: 1/2 inch

Additional Information
1 Wave tile = 10.33 sqft.
65% Shock Absorption
System GMAX <100
High Drainage Capacity Vertically and Horizontally

Main Advantages:

- Engineered geometry captures and redirects forces away from the point of impact ensuring superior foot stability for athletes.
- Wave Multipurpose Drain Tile is constructed from a durable, high-impact copolymer that outlasts foam shock padding.
- Injection molded and ultrasound welded modules
- Easy modular installation from optimized design and patented unfolding concept
- Cools the surface play area due to its subsurface structure.
- Made from recycled high impact polypropylene and 100% recyclable
